Nutra Grow is a palatable, sweet tasting premium stock feed blend ensiled in round bales. Nutra Grow is ensiled in plastic wrapped bales in order to preserve the nutritive value all year round.

Suitable for:

Nutra Grow Blend

Nutra Grow is a bread based starch source that will benefit forage based diets short of fermentable energy.

Nutra Grow gelatinised starch (aids in digestibility) helps improve rumen fermentation, optimising digestion of structural carbohydrates and increasing protein flow to the small intestine.

Nutra Grow will enrich the energy and starch contents of most diets cost effectively and as part total mixed ration encourages dry matter intake which is critical for higher milk production and live weight gains.

Nutra Grow is very palatable and can be used as an ingredient as part of a beef finishing feed, maize silage replacer/enhancer or spring grazing buffer feed.

Nutra Grow ensures a consistent source of nutrients, no separation and is ready to use. The useful protein content makes it ideal to use as a forage extender when fed as a

part of the total mixed ration. When fed at lower feeding rates Nutra Grow can make a very cost effective protein contribution to most diets.

Conveniently Packaged

Nutra Grow is ensiled in plastic wrapped bales in order to preserve the nutritive value all year round.

The compact 750kg bale size makes

it more convenient with ordering, delivery and moving bales around the farm

- More flexibility to feed as required
- Can order and deliver smaller loads
- More convenient to move bales around the farm
- Greater shelf life
- Easier to store

Feeding guide

Nutra Grow is suitable for all ruminating animals. Nutra Grow should always be fed in combination with good quality roughage/hay as part of a total mixed ration. Cattle should be adapted by introducing Nutra Grow into the ration at low levels (10 to 15% of the diet) and increasing the level in steps after a period of several days of constant intake and appetite.

Finishing Beef Cattle: Up to 12kgs/head/day

Dairy Cattle: Up to 10kgs/head/day

Growing Cattle: Up to 5kgs/head/day

Sheep & Goats: Up to 1kgs/head/day

We also recommend access to good quality pasture and fresh water at all times.

Availability & storage

Available all year round.

Recommend to always feed as a part ingredient in a total mix ration properly mixed in a simple ring feeder (< 10% losses compared to 50% loss if fed on the ground).

For storing, round bales should not be stacked on top of each other since it will 'squash' the bale and lose the integrity of the seal. Regularly check and repair any holes immediately. Once opened Nutra Grow bales should be eaten within 7-10 days depending on the prevailing conditions.

Additional notes

This information should be used as a general guide only. Please consult with your nutritional advisor to determine the appropriate needs for your animals.
