Brewers Sweet Grain contains all the properties of Brewers Grain with the added benefit of starches and sugar. Brewers Sweet Grain has been developed exclusively to offer a complete semi moist mix feed.

## Brewers Sweet Grain

Brewers Sweet Grain consists of a unique blend of ingredients that encourages dry matter intake which is critical for higher milk production and live weight gains.

A stock feed that is high in protein for improved milk production and reproductive tract reconditioning after calving that also supports muscle growth in young cattle.

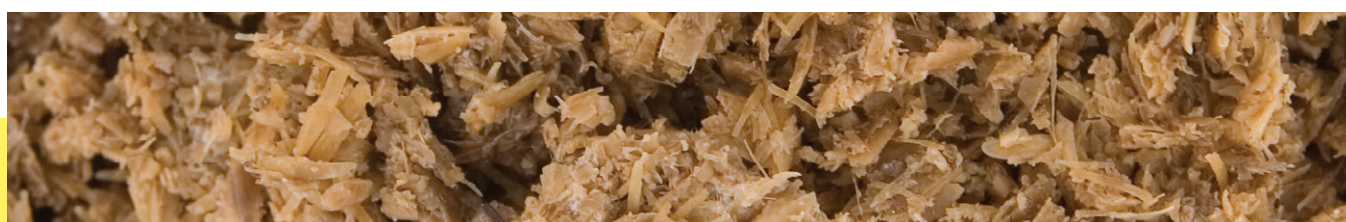

Brewers Sweet Grain ensures a consistent source of nutrients, no separation and is ready to use

As a high fibre feed, which can be used as a spring grazing buffer feed or forage replacer/extender. The medium oil content and effective fibre sources from malted co-products together with Proteena Bread will benefit diets lacking of fermentable energy.

Brewers Sweet Grain (NSW & Victoria) with added brewer's yeast (a functional feed additive) to assist the rumen microbiota, strengthening the immune system and reduces pathogen contamination while also contributing to the animal's overall health.

Farmers limited by freight will also find Brewers Sweet Grain easier to access due to its drier composition. However, the moisture content of Brewers Sweet Grain is still sufficient to enrich dry rations.

### Feeding Guide

- Brewers Sweet Grain can be fed ad-lib or as an ingredient in total mixed rations for dairy, beef cattle and sheep
- Dairy Cows: Recommended daily intake up to 25.0% of total dry matter intake (commonly fed up to 12.5kg as fed per cow per day).
- Beef Cattle: Recommended daily intake up to 20.0% of total dry matter intake
- Sheep: Recommended daily intake up to 10.0% of total dry matter intake.
- Shelf life needs to be considered when formulating rations.

### Additional notes

The above information is to be used as a guide only and not to be used as the basis for recommendations.

Ensure clean fresh drinking water are always available.

Please consult with your nutritional advisor to determine the appropriate inclusion rates for your nutritional situation
