A co-product from the brewing industry. It consists of the rootlets following germination of barley grains (*Hordeum vulgare* L.) obtained after drying and cleaning of malted barley. Malt Combings (also known as malt culms) offers high levels of by-pass protein and high neutral detergent fibre.

Feeding Guide

- For cattle, it can be fed at a rate of up to 5kg fresh weight per cow per day.
- Shelf life needs to be considered when formulating rations.

Additional Notes

The above information is to be used as a guide only and not to be used as the basis for recommendations.

Ensure clean fresh drinking water are always available.

Please consult with your nutritional advisor to determine the appropriate inclusion rates for your nutritional situation
