Our specially formulated Proteena[®] All-Rounder pellet is perfectly suited for the dairy and feedlot industries. Proteena[®] All-Rounder pellet is a unique blend of starches, sugars, fat and fibre, for a highly palatable, nutritious everyday feed..

A Well Rounded Nutritional Source

Proteena® All-Rounder pellet contains a full compliment of macro minerals, vitamins and trace elements as well as rumen buffer, Monensin and biotin as standard inclusions.

Unique Energy Source

The starch, sugar and fat content provide safe feeding with a reduced chance of acidosis, without sacrificing live weight gain or milk production.

Sweet, Palatable Taste

Proteena® All-Rounder pellet consists of unique ingredients that produce a sweet, palatable taste that encourages dry matter intake which is critical to milk production and live weight gain.

High Neutral Detergent

Fibre Content

Reduces the risk of acidosis and improves overall animal health when compared with traditional pellets.

Improved Utilisation

The inclusion of cooked cereal grains contribute higher levels of gelatinised starch, together with the steam conditioning of Proteena® Pellets in the production process, further gelatinises the starch content, thereby improving digestion and feed efficiency.

Consistent

Proteena® All-Rounder pellet ensures a consistent source of nutrients, no separation and are ready to use.

Feeding guide

Proteena® All-Rounder pellet is designed to feed up to 40% (max) of your herd's dry matter intake in pasture based system.

For Dairy Cattle: (Recommended daily intake up to 30% of total Dry Matter Intake (DMI))

Dry Matter Intake (DMI) of a 500 kg cow (4% of Body Weight) = 20 kg DMI/day

$20 \times 30\% = 6\text{kg}$ on a Dry Matter (DM) basis

As fed (As Is): 6.7kg /day

We also recommend access to good quality pasture and fresh water at all times.
