Suitable for:

Feeding Castlegate James HiStarch Pellet to dairy cows is a viable option to help with milk production by providing supplemental rumen degradable protein and energy.

CJNZ HiStarch Pellet

is the base product for numerous dairy rations around the world. With okay amounts of protein and energy in pelletised form for added flowability, this product is ideal for your silo blends. HiStarch Pellet is produced as a byproduct of the wet milling process of maize grain. It offers medium protein and high energy, consisting of a grain fraction and whole stillage. For ruminants, this palatable, low-starch product is high in rumen degradable protein, B vitamins, phosphorus and highly digestible fibre.

Feeding guide

Please consult with your local CJNZ Key Account Manager or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

All information is presented in good faith and to the best of our knowledge and resources; however variation in values and outcomes of feeding this product may occur.

Availability

Can be purchased on a contract bases or on the spot market as a one off load. Consult your local CJNZ rep for the best option to suit your needs.

Additional notes

This information should be used as a general guide only. Please ask your CJNZ Key Account Manager about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals
